We were very pleased with the work done by Glass Guru to fix our foggy windows. The replacement glass looks great. We would definitely use again if needed.

May 14, 2019

We have had window panes replaced on 3 windows so far. the work has been well done. Pricing went up very significantly for the 3rd window which was just done. One pane cost us more to replace than the whole window had when we had it replaced.

Could not be happier with the window glass replacement by Tyler Wine of Glass Guru! Very professional and courteous. Tyler called because he was running late and gave me an actually eta! He laid a tarp on the floor to wipe his feet, instead of my oriental! Took our window to his van and installed the glass into our frame, within 15 minute our window was back in place and looked brand new. Tyler cleaned up and explained the warranty and asked if I had any questions! EXCELLENT EXPERIENCE!

Wood had been glued and this made job very difficult and time consuming to install replacement glass. They found a solution and quality was top notch. I was never asked to pay more than quoted price made prior to discovery of glue. Class act and rare to see these days! Thank you Glass Guru!

Quick and accurate quote, quick-professional installation. Only had them now for a week, but I'll tell you that being able to look out my window is really nice. It appears that they have been installed correctly, but some cold weather shifts this fall and winter will help me determine for sure the quality and installation. So far - so good - everything that I was told is what happened! From that standpoint - invite them over for a quote - you'll save yourself some money and a lot of aggravation.

They fixed the glass in a broken double pane window. I could have replaced the whole window for what I paid for the glass to be fixed. The installation guy said he had never seen the type of mechanism that my window had to crank it open...which seemed weird. And he said it was broken, so he took the gear out and left it on the window sill. I guess since it was broken it didn't need to be inside the window. But overall, I have buyers remorse and should have just replaced the window. They did do a good job fixing the glass though.

This was our second time using Glass GuRu. The first time was perfect! The second time, the guy was late, I had to call and they had to call me back to tell me he would be 2 hours late. He showed up and had an extremely hard time removing the broken window (which the previous guy had no problems with). After a long time of him banging and go inside and outside he successfully removed and replaced the window. After I paid him and he left I noticed the interior wood work around the window was attached and dented from his attempts to get the window out. There is no way to fix his damage.
