My insurance company always seems to find companies that fit the best for their customers. They provided us with South River and we are extremely satisfied with the work they have done for us.

Wouldn't use this company again. They didn't pay attention to detail nor seem to value our personal possessions.

South River Restoration did an excellent job restoring my basement after it suffered water damage from a broken pipe. They restored it in a timely manner and were very professional. Thanks Gil and team for a job well done. We couldn't be happier.

We had used them about 10 years ago when the same problem occurred, unfortunately for us, from that job, I knew how they performed and I called them right away when this happened.

South River Restoration was professional and so easy to work with during a time when I was so stressed and anxious. I had never had a flood before and they made me feel calm and confident that things were going to be taken care of without a lot of effort on my part. The job was completed on time and I was amazed at how they took care of everything and explained the process to me step by step. I would certainly recommend South River Restoration! Well done and thank you!

After the initial appointment where they installed the fans, dehumidifiers, and opened up walls / ceilings, I never got any additional communication from the South River Restoration team. They were supposed to notify me when they would be coming by our house to check on moisture levels, which they never did. I had to call South River multiple times to get an answer on when they would come by to check moisture levels. Each time my wife and I went by the house, we found that the circuit breaker had been tripped, leaving most of the fans off and indicating that no one from South River had come by. Once they finally came back to the house, they informed me that there was no more moisture and said they would pick up the equipment. They picked up their equipment on only one level of the house (they had put fans / dehumidifiers on all 4 levels of our house) and then were very unresponsive when I contacted them to get them to come and get the rest of their equipment. It took about a week for them to finally come back and pick up the rest of the fans / dehumidifiers. Very poor customer service / responsiveness but they did dry the house out.
